Regarding MB 18-184

My name is Betty Shapiro, and I am an owner and General Manager of KGID 96.3 FM in Giddings, Texas.

I am in full support of the MMTC and SSR Communications FM Class C4 / 73.215 proposal to allow eligible Zone II Class A stations to upgrade in power from 6,000 Watts to 12,000 Watts.

I also feel that for this to be implemented fairly and quickly, that stations eligible for this sorely needed relief should be able to do so without a fully spaced allotment site, as long as they are not causing interference to other licensed facilities.

Please implement the MB 18-184 proposal fully without delay and consider the proposal **without the need for allotment sites**. Many small broadcasters need this relief.

Sincerely,
Betty Shapiro
KGID 96.3 FM
